

BREAKING NEWS!

Implementacion of a new
intrusive classroom in schools.

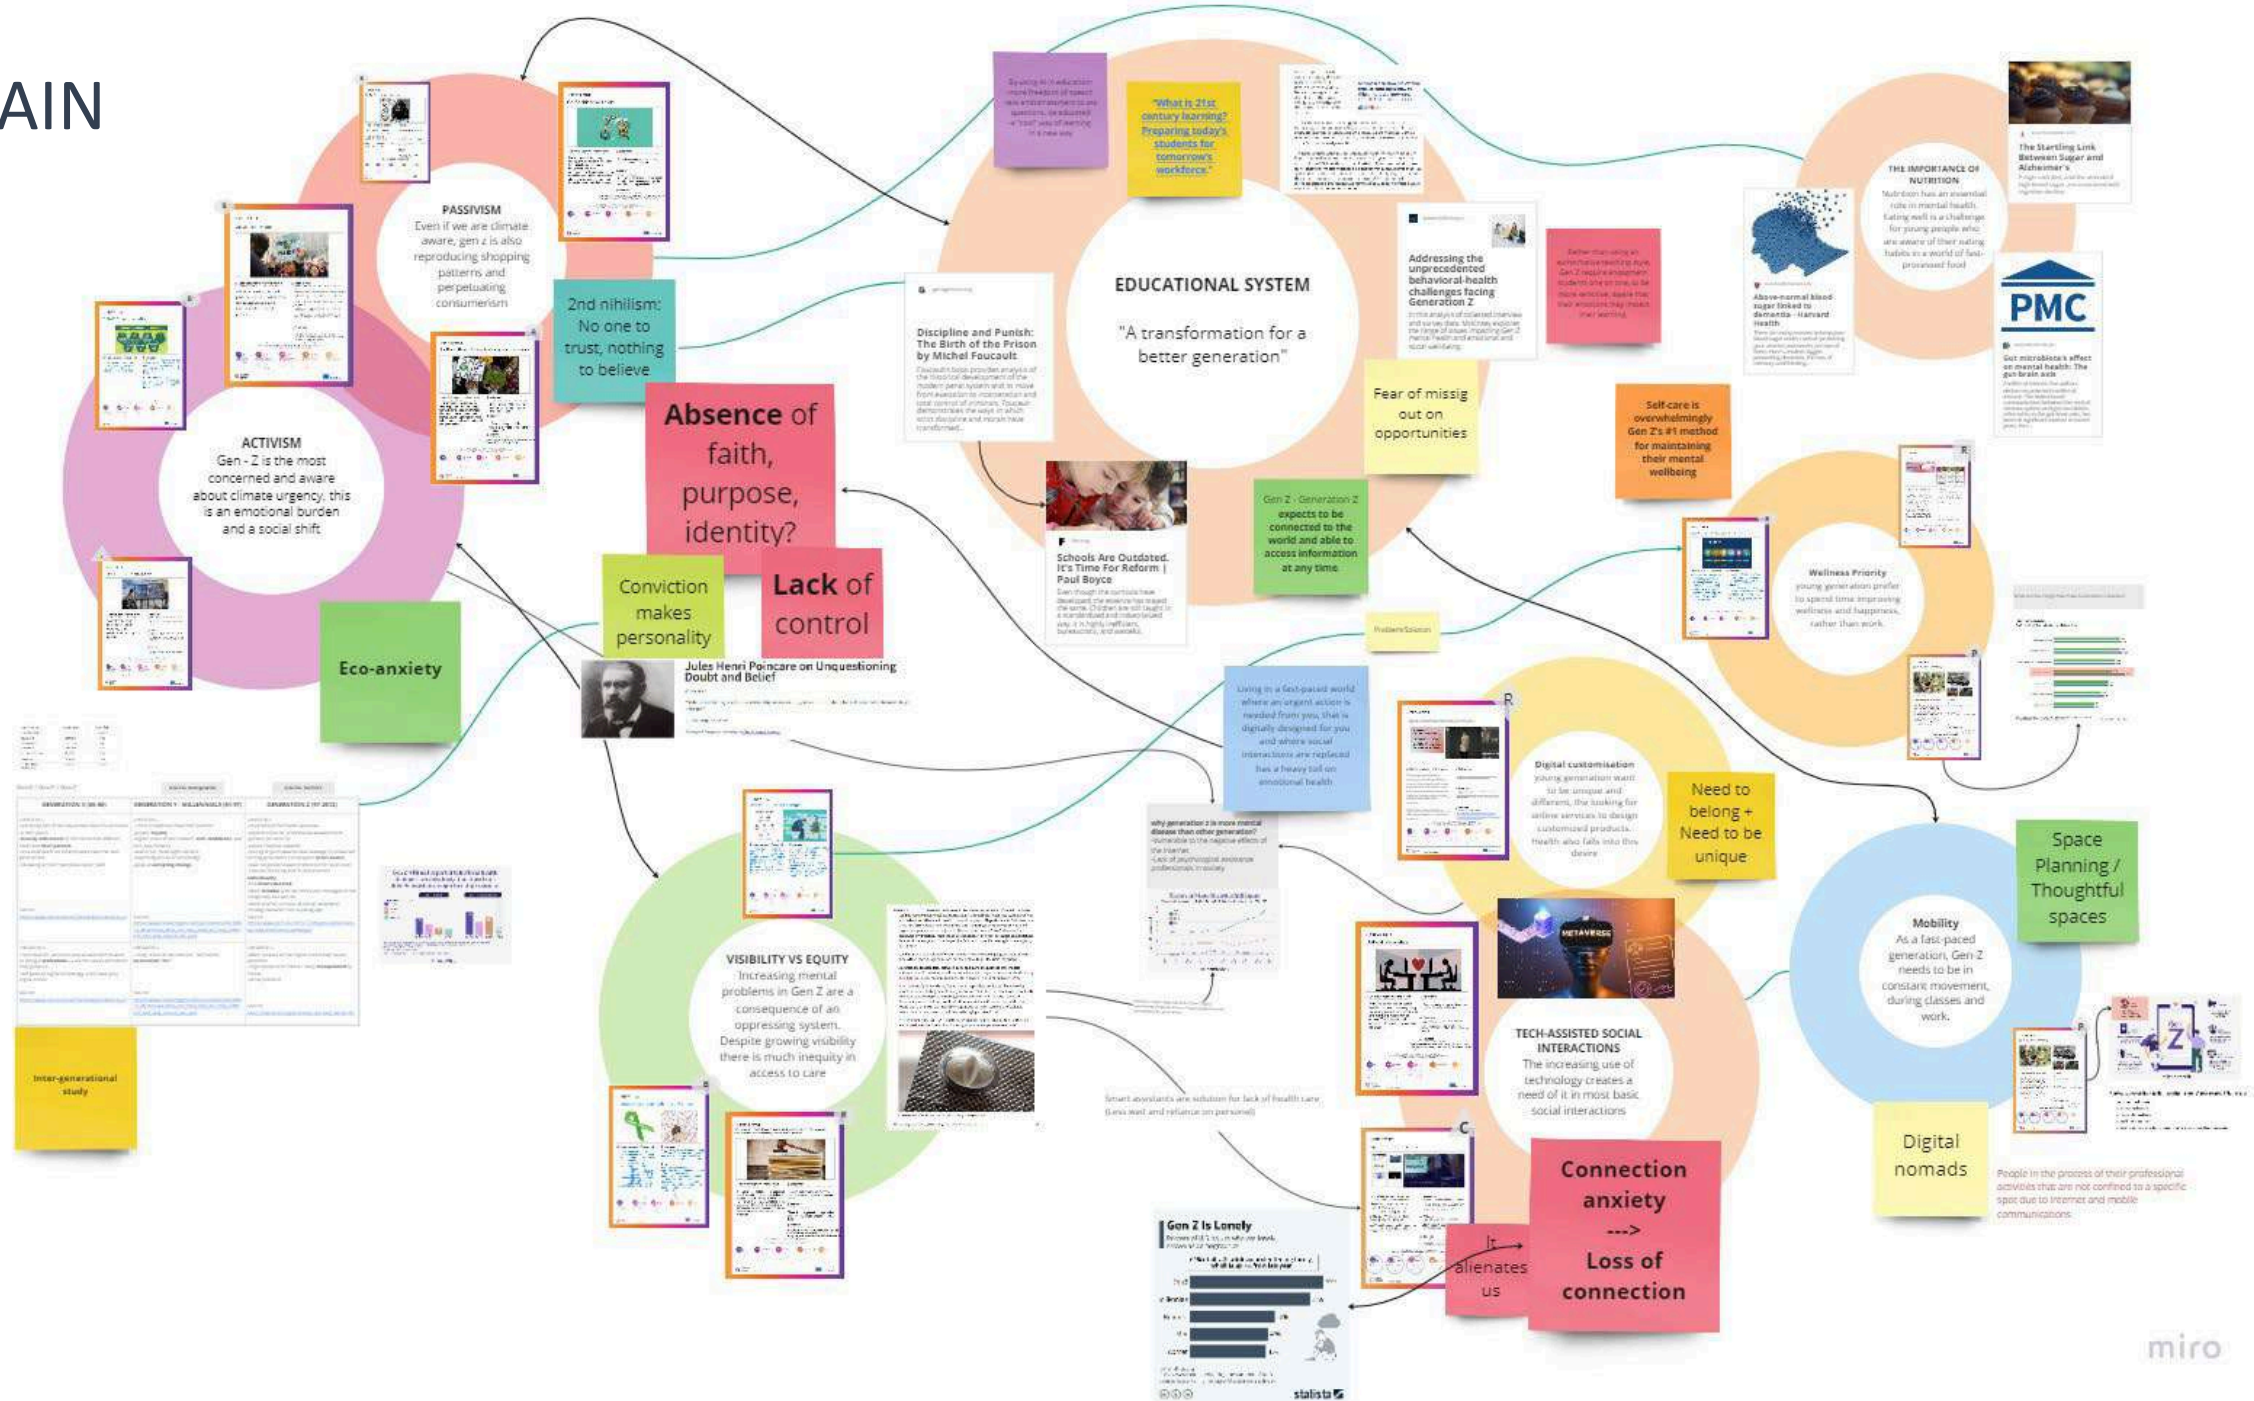

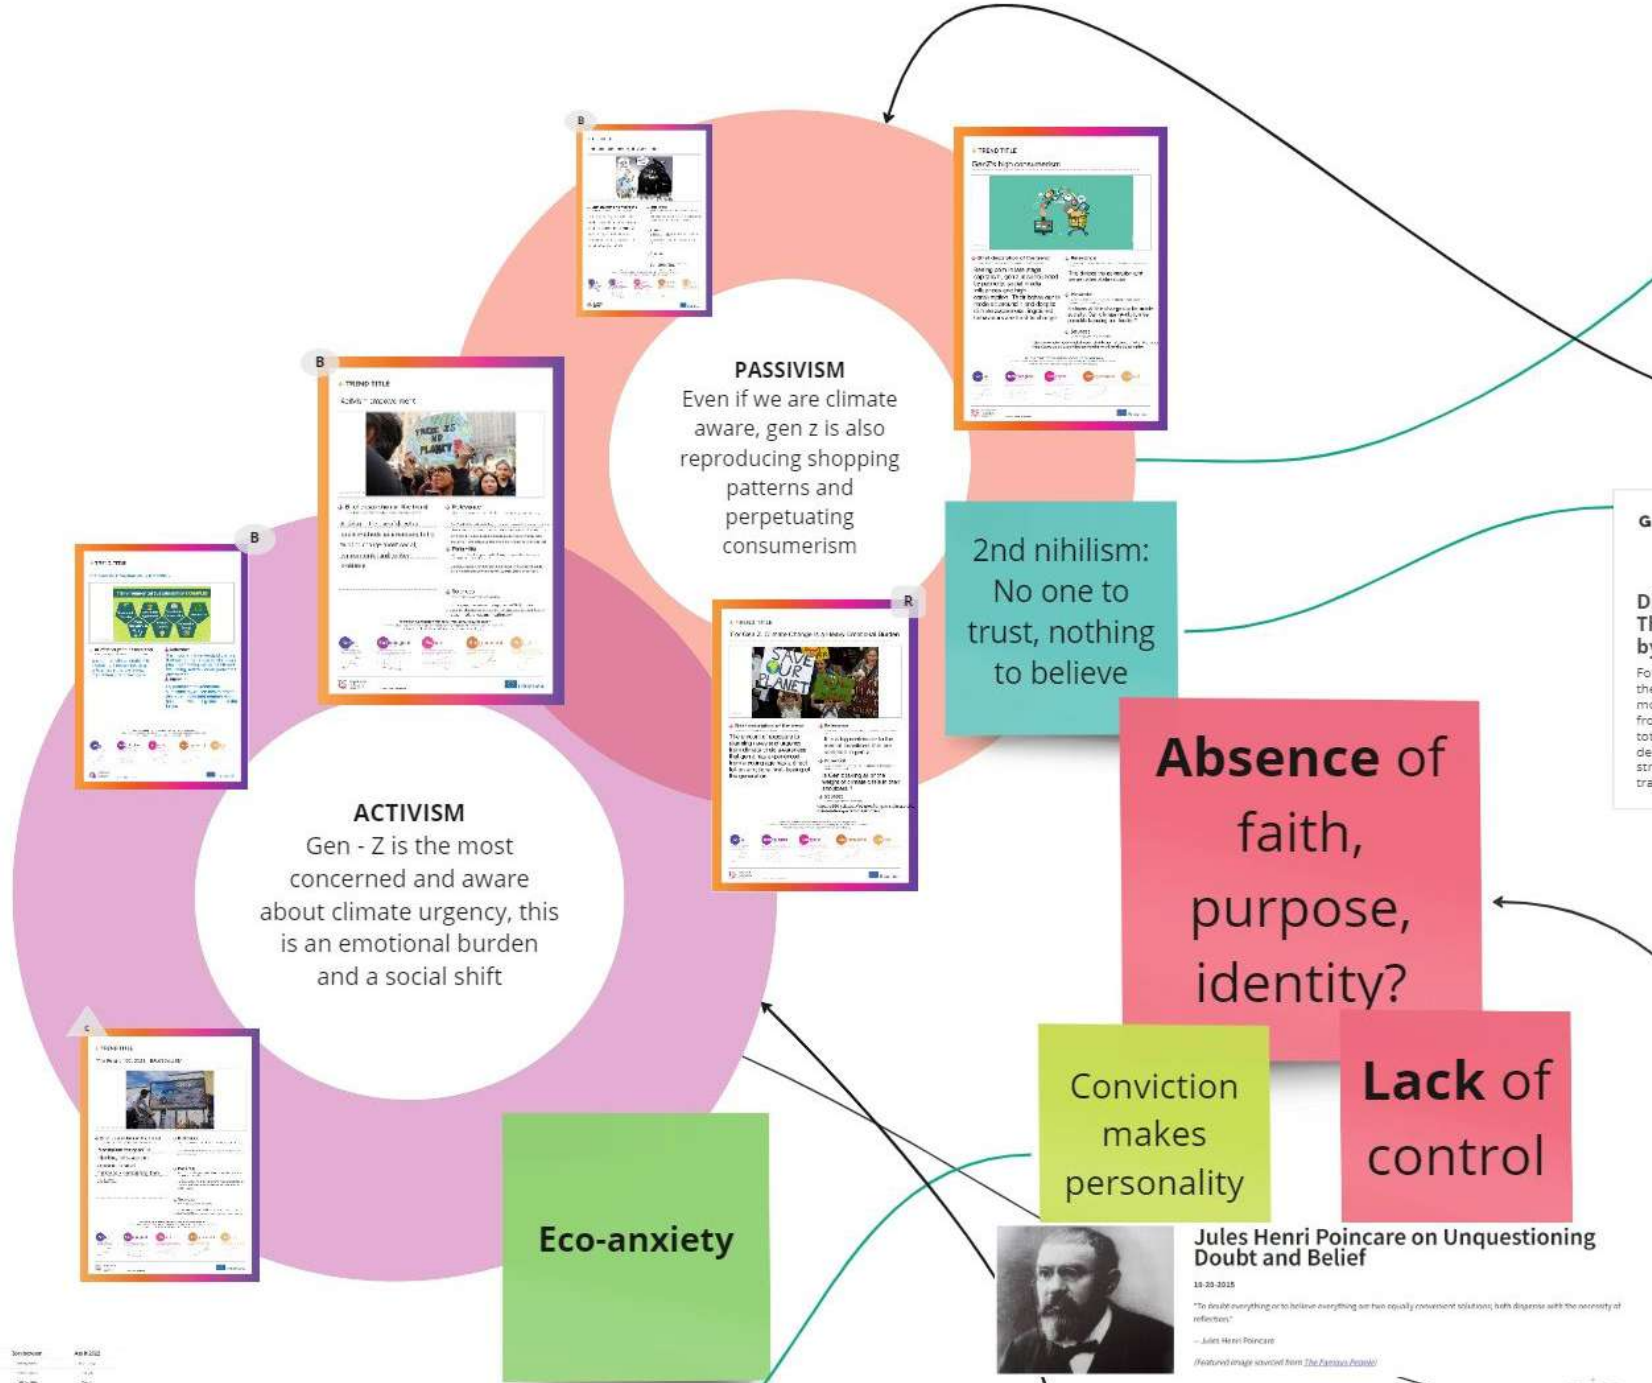

Mental And
Emocional Care
(GenZ)

DOMAIN MAP

PASSIVISM
 Even if we are climate aware, gen z is also reproducing shopping patterns and perpetuating consumerism

ACTIVISM
 Gen - Z is the most concerned and aware about climate urgency, this is an emotional burden and a social shift

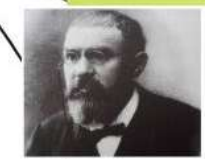

2nd nihilism:
 No one to trust, nothing to believe

Absence of faith, purpose, identity?

Conviction makes personality

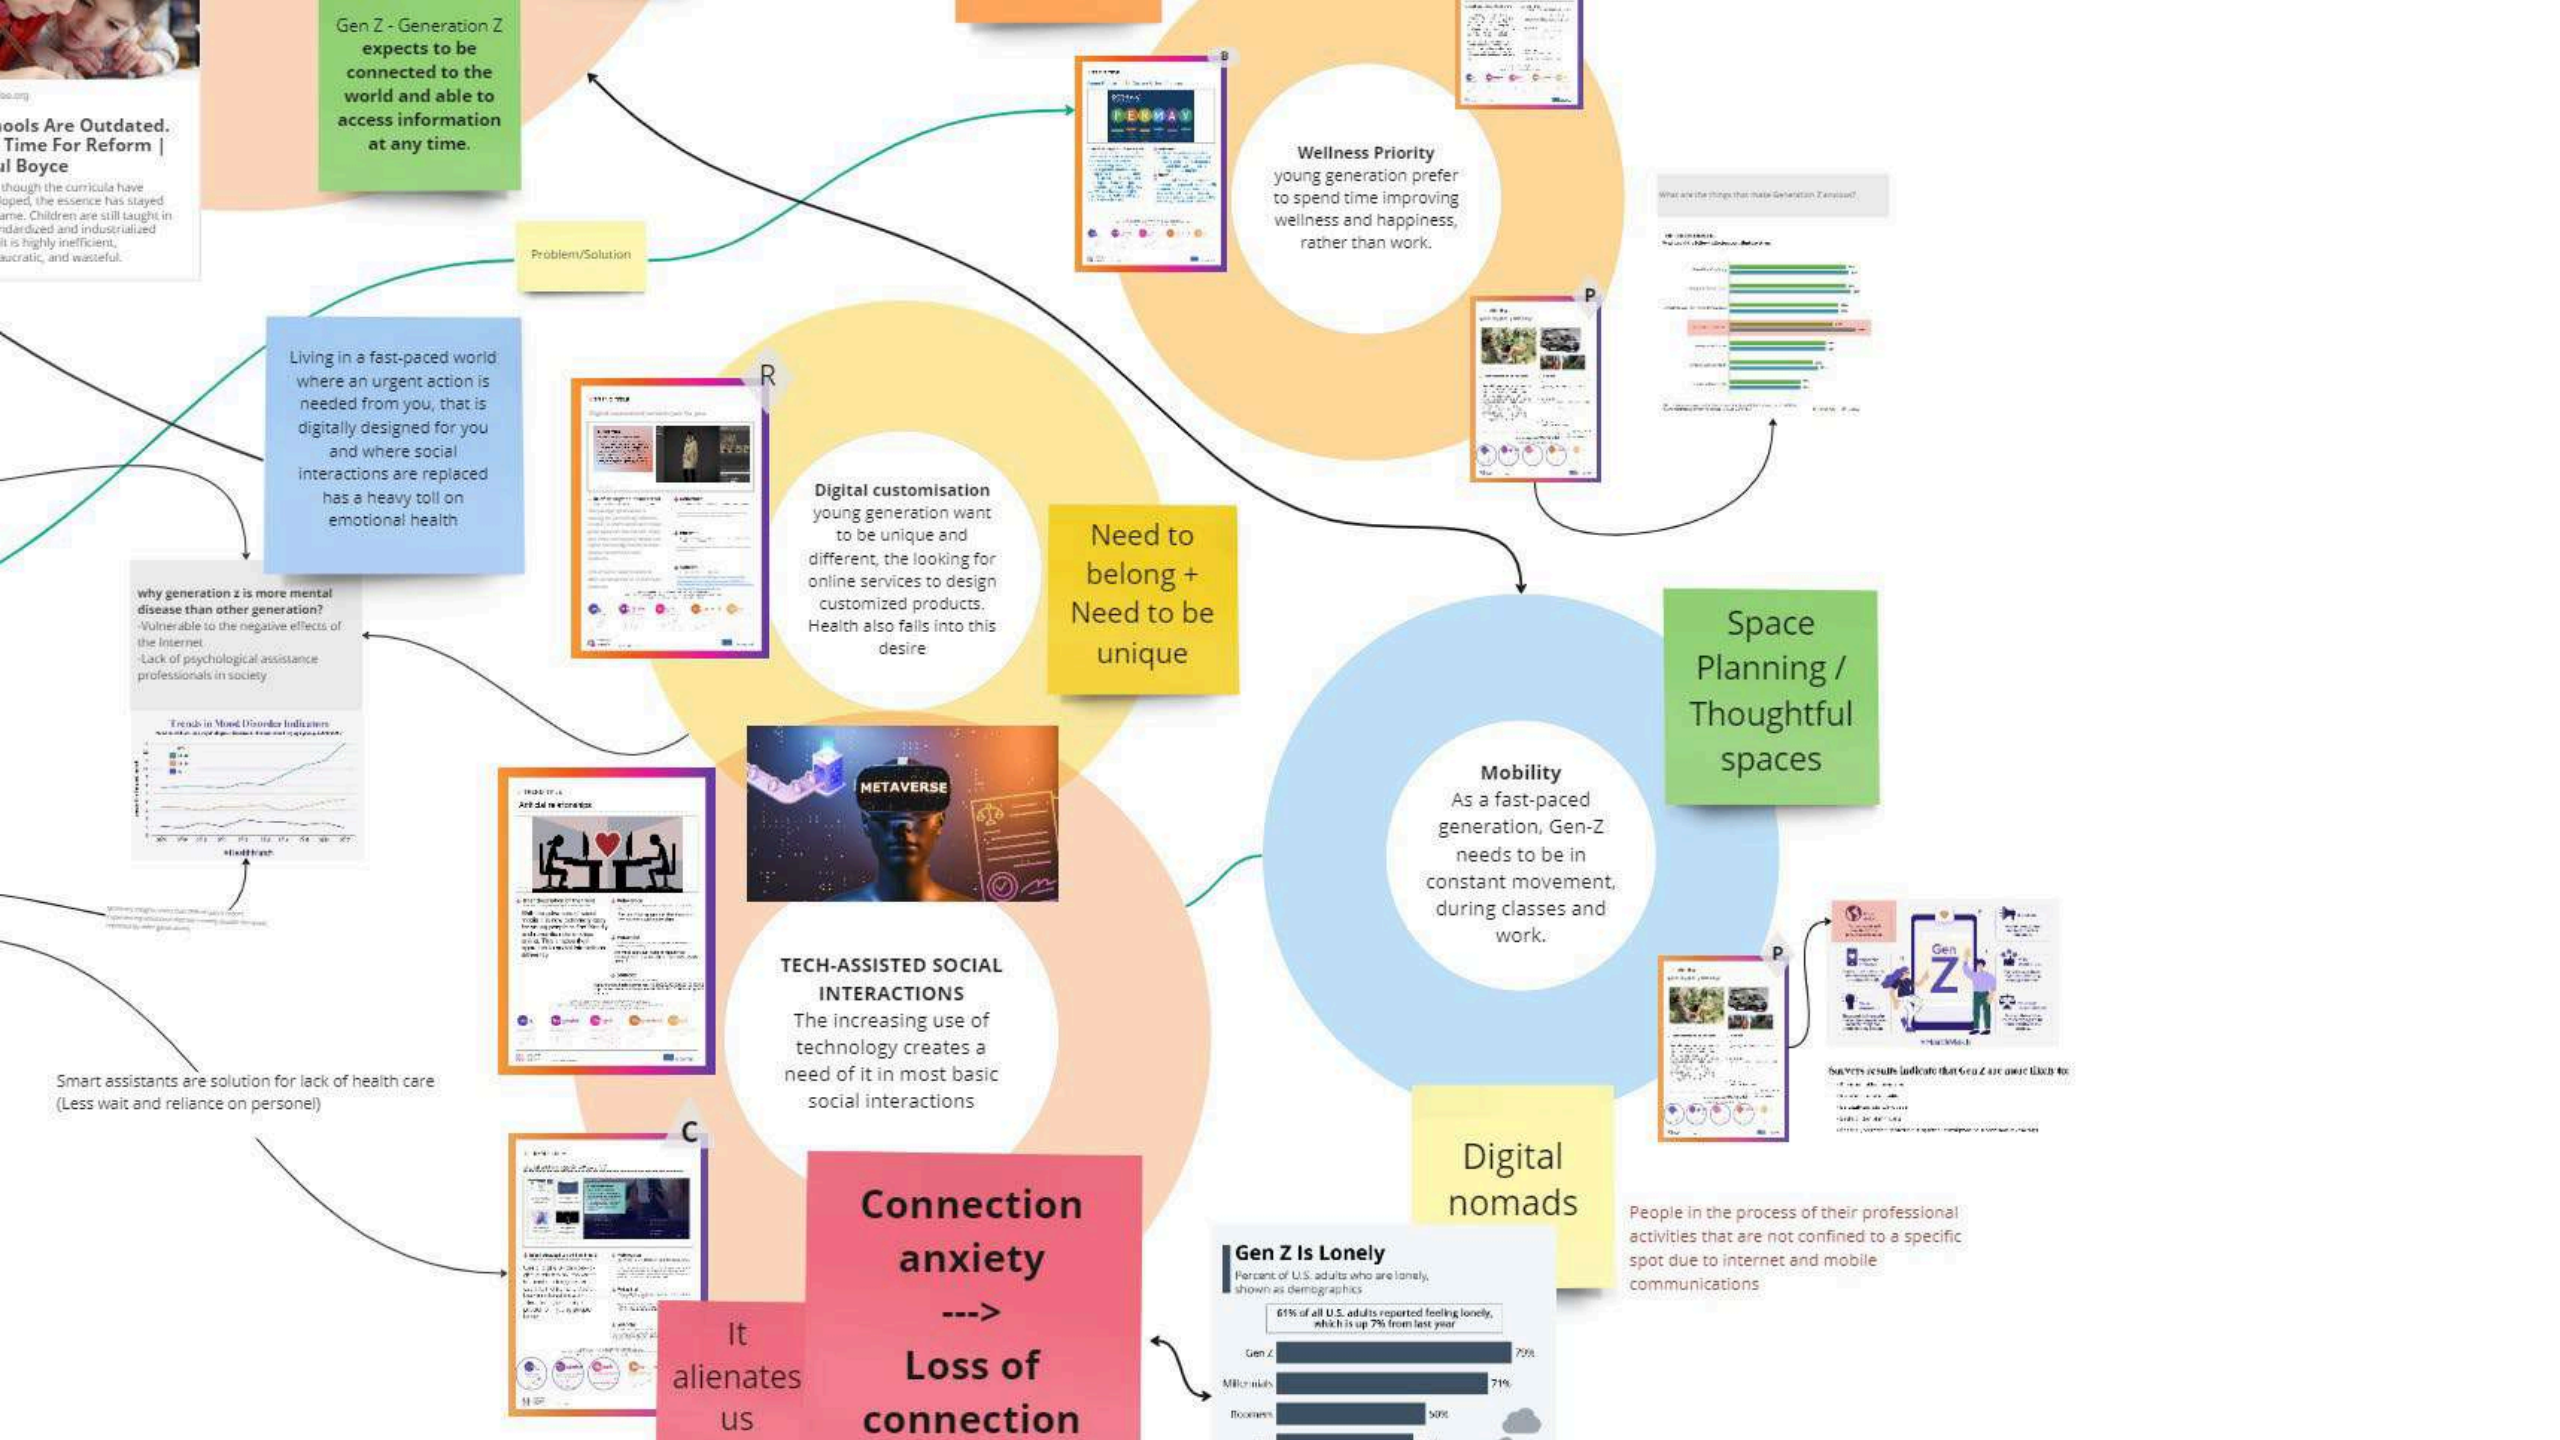

Lack of control

Eco-anxiety

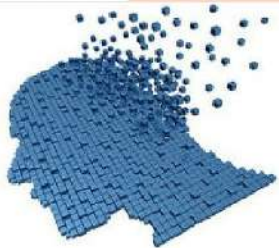

Jules Henri Poincaré on Unquestioning Doubt and Belief
 18 03 2015
 "To doubt everything or to believe everything are two equally convenient solutions; both dispense with the necessity of reflecting."
 — Jules Henri Poincaré

THE IMPORTANCE OF NUTRITION

Nutrition has an essential role in mental health. Eating well is a challenge for young people who are aware of their eating habits in a world of fast-processed food

Gut microbiota's effect on mental health: The gut-brain axis

Conflict of interest: the authors declare no potential conflict of interest. The bidirectional communication between the central nervous system and gut microbiota, referred to as the gut-brain-axis, has been of significant interest in recent years. Incr...

By using AI in education:
-more freedom of speech
-less embarrassment to ask questions, be educated
-a "cool" way of learning in a new way

"What is 21st century learning? Preparing today's students for tomorrow's workforce."

Faculty aspire to develop student thinking skills, but research shows that in practice, we tend to aim at facts and exercises in the disciplines, or the lowest cognitive levels, rather than the development of smarter practices.
Schools teach students what to think, as opposed to how to think. There are important critical skills that aren't taught.
Critical thinking is key to creating free and individual minds. It is also increasingly important in today's age, where the line between information and facts is so fine. In fact, 95 percent of statistics are made up. A critical mind will question where this actually came from. Where do the statistics come from? Is it actually reliable?
The issue we have today is that students are taught to test. Whether the information makes sense or not is irrelevant as long as it is correct. This comes at a cost. Schools teach students what to think as opposed to how to think. There are important critical skills that aren't taught. Do students truly question whatever they read or accept any claim blindly? Or, perhaps, do they accept it as long as it confirms their biases? The current system is failing because it is offering the wrong type of education. We must develop individual minds, not mindless zombies.

Addressing the unprecedented behavioral-health challenges facing Generation Z
In this analysis of collected interview and survey data, McKinsey explores the range of issues impacting Gen Z mental health and emotional and social well-being.

Rather than using an authoritative teaching style, Gen Z require engagement students one on one, to be more sensitive, aware that their emotions may impact their learning.

Schools Are Outdated. It's Time For Reform | Paul Boyce
Even though the curricula have developed, the essence has stayed the same. Children are still taught in a standardized and industrialized way. It is highly inefficient, bureaucratic, and wasteful.

Problem/Solution

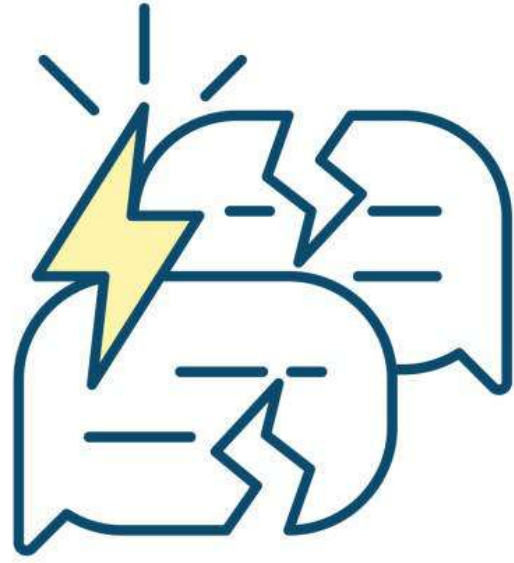

ARE THE TEACHING WAYS OUTDATED?

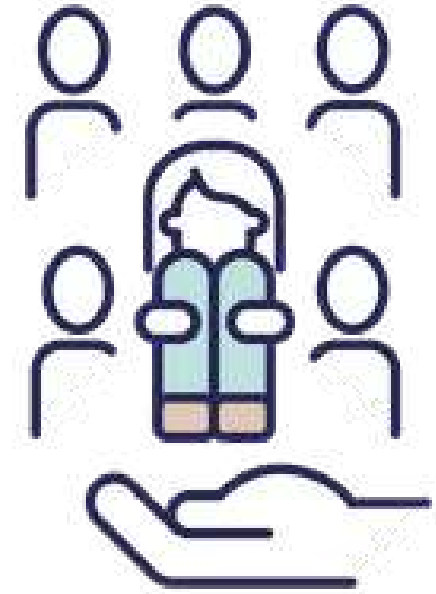

Lack of Interest

Problems with communication

Adaptation to school rhythm

IN A FUTURE OF:
Community reliance/Competitive social mindset

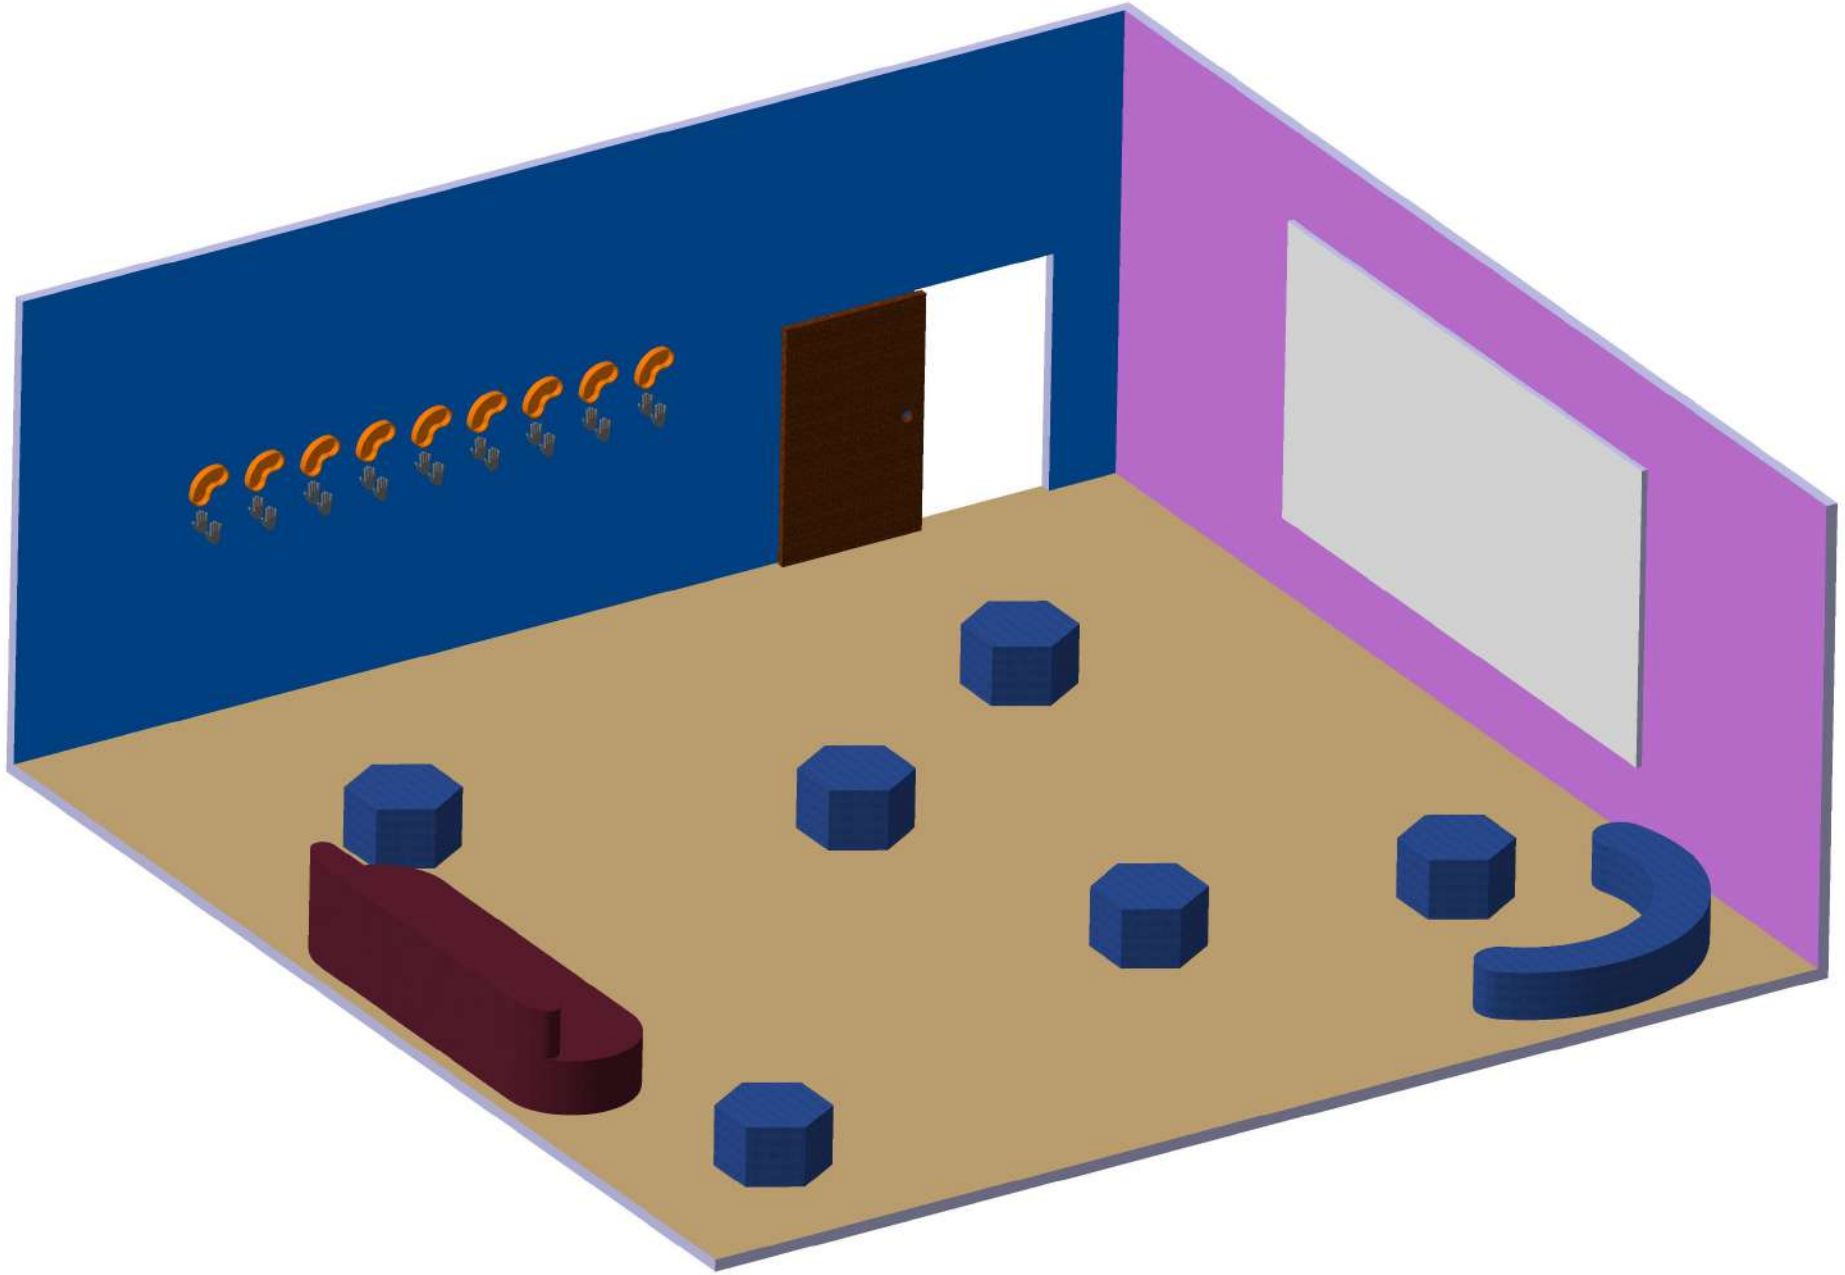

A future in which people would focus on their performance while having strong social bonds. This means there is a lot of sense of teamwork and people push each other forward. AQ is more important than IQ

CreatED

CreatED

- Open during break and accessible to teachers during classes
- Emotional feedback
- Movable furniture and boards
- Augmented reality set
- Target students : Middle school

CreatED

- An attractive ambivalent space
- Induce creation and exchange in students
- Shift towards a new type of learning

END

Thank You
