Micro theme

Everywhere's Care

The challenges of this topic are :

- to provide medical protection to as many people as possible.
- to ensure the widest possible geographical access to healthcare
- to provide easy access to regular check-ups

Everywhere's care

Future Trends & Domains

Sharing Care on a family level

Nature-based lifestyles

↗ **Smart Working**

↗ **The Housing-as-a-service (HaaS)**

↘ **Number of doctors, caregivers**

Vision of the Future

In 10 years,

Nomad will have full and equal access regardless of their location

to monitor their physical and mental health whenever they wish
to enable them to monitor their health, and prevent disease.

Because 1) of the rise in smart working lifestyle, employees will need to be able to be aware of their health situation by themselves,
and 2) to respond the shortage of doctors.

What are the problems for this future ?

What will be the problems people will face in this future ?

How can we provide equal care for future nomads?

03. Problems

How to help these nomade people regardless of their location ?

How to help these people keep full control of their health independently, wherever they go ?

How to enable these people to ensure their good mental health ?

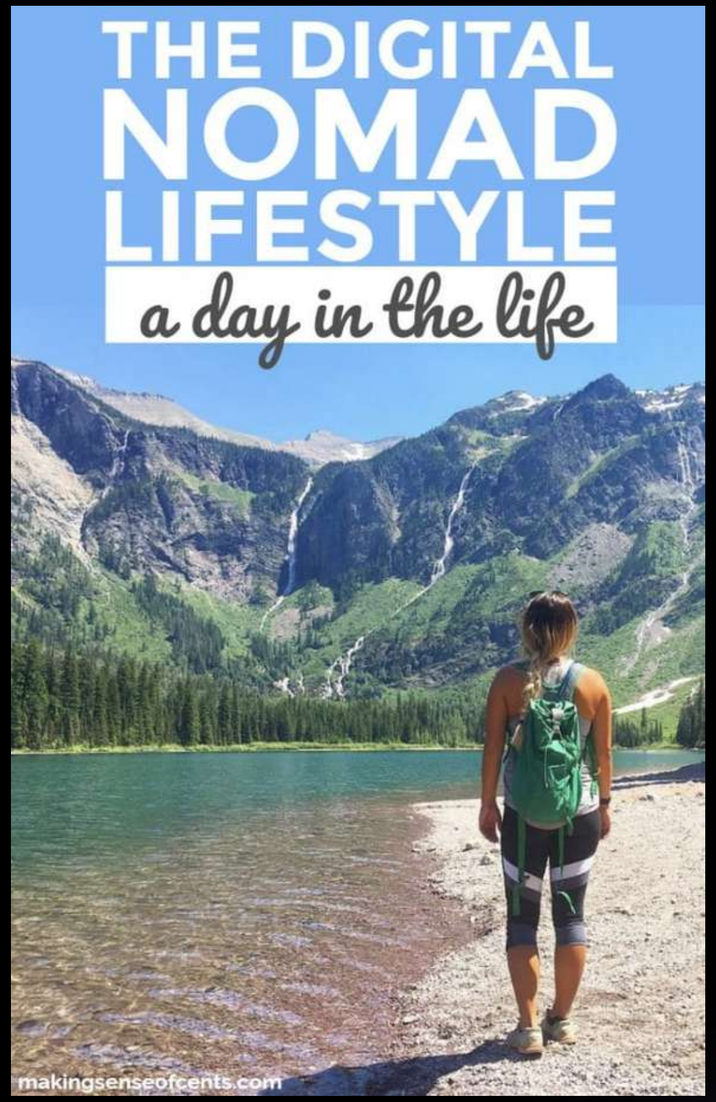
Vision Statement

In 10 years,

Nomads' health condition will be able to be easily examined

to facilitate access to regular health check-ups,
to allow early detection of diseases,
and to decrease the workload of the doctors,

Because 1) of the rise in smart working lifestyle,
employees will need to be able to be aware of their health situation by themselves,
and 2) to respond the shortage of doctors.



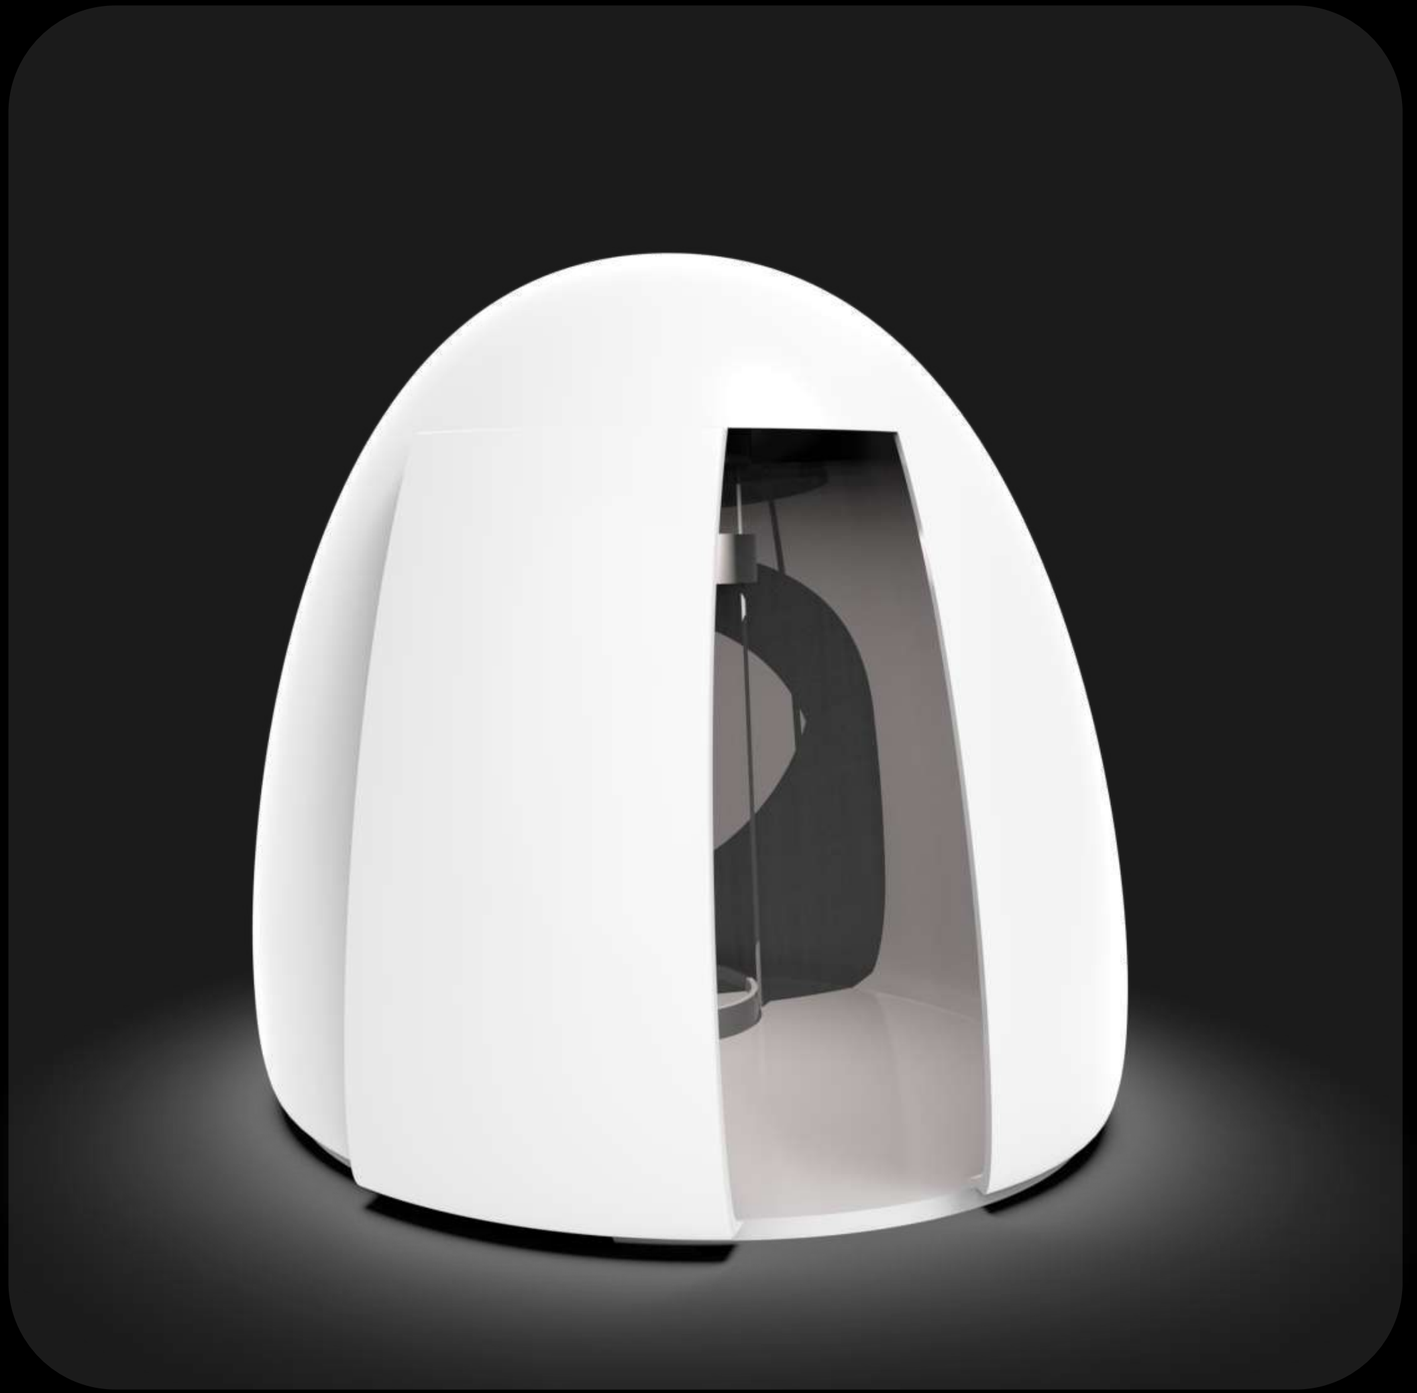
04. Proposal

Decentralized Health Check-up Booth

Anywhere, Anytime.

MediBox

A smart box, that helps you doing all your check-ups without going to the hospital



MediBox Exterior

A smart box, that helps you doing all your check-ups without going to the hospital

Shape Inspirations

BATHROOM SETTING

Public bathroom in Paris

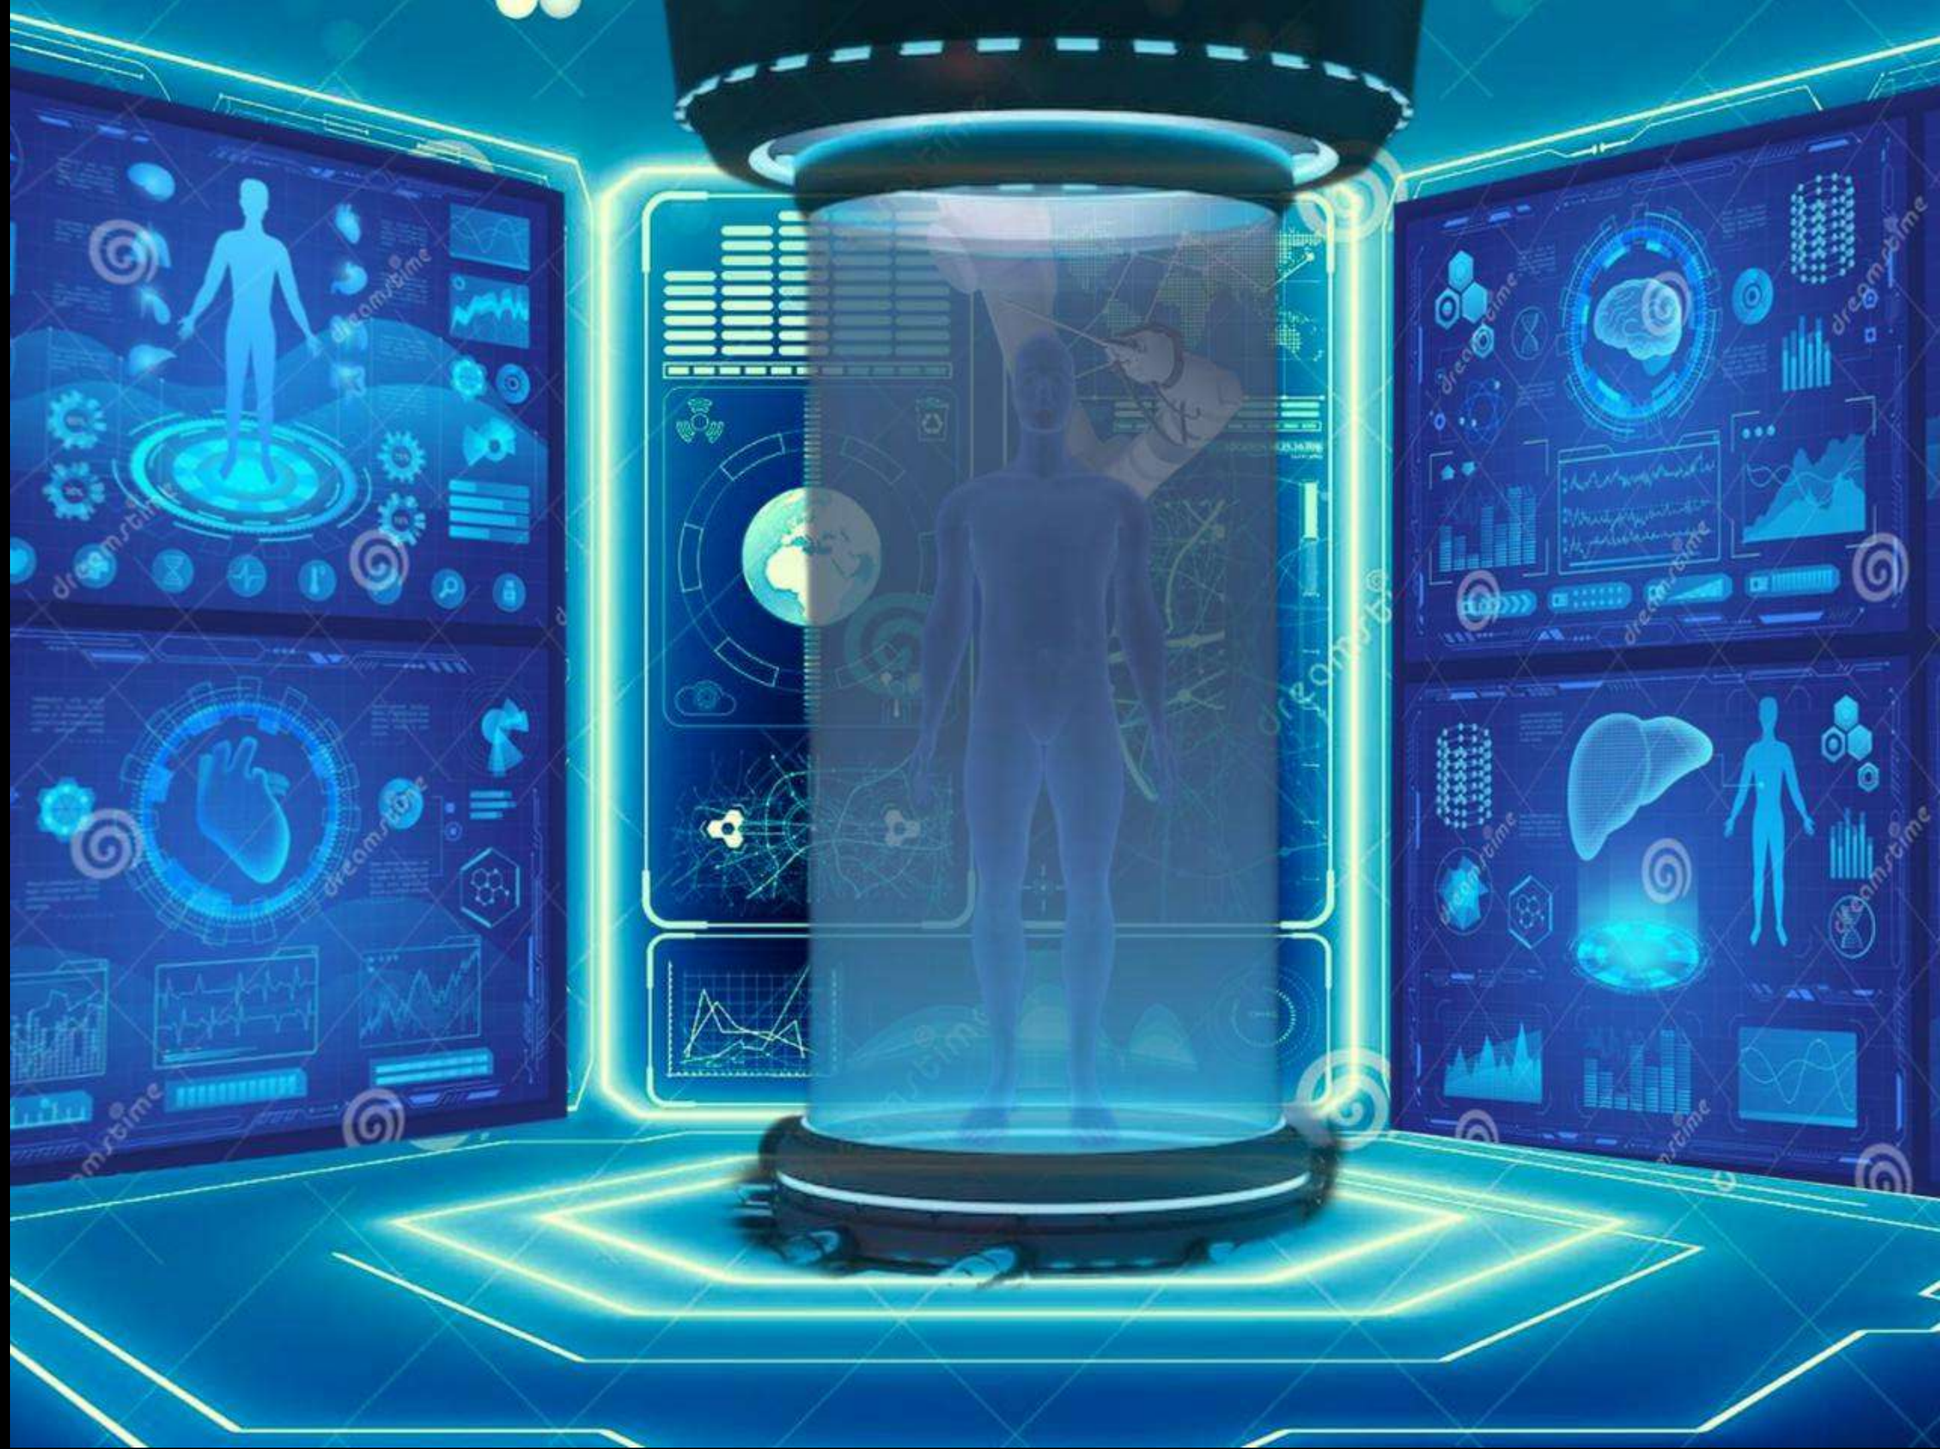
BOOTH SETTING IN PUBLIC

Payphone booth

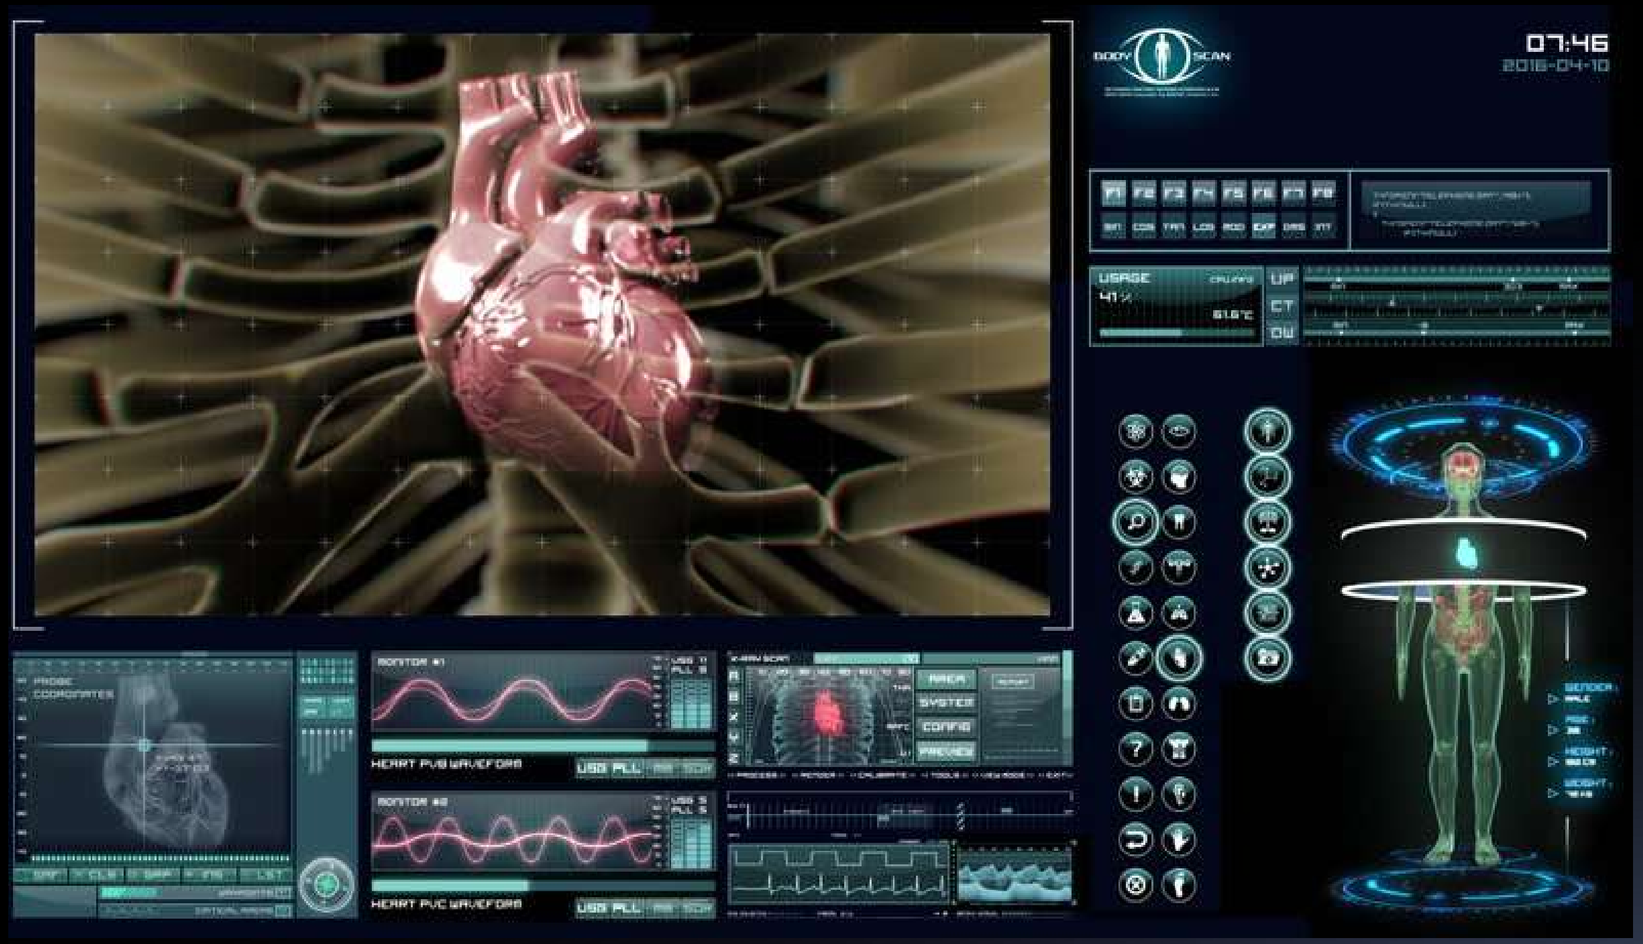
FUTURE NOMAD HOMES

Proto-Habitat

Interior



04. Proposal



MediBox will be used as 3D anatomy scanner and also would be able to do regular checkups tests like Physical and dental exams, everywhere and every time.

04. Proposal

Annual Physical Exam Checklist by Age

Annual physical exams are done to improve an overall healthy lifestyle and to detect future illnesses. The details of exams are different based on age, and biological gender.

The devices inside of the box will be able to cover the extensive exam checklists.

How it works?

1

Your personal AI assistant can book an appointment for the nearest check-up box

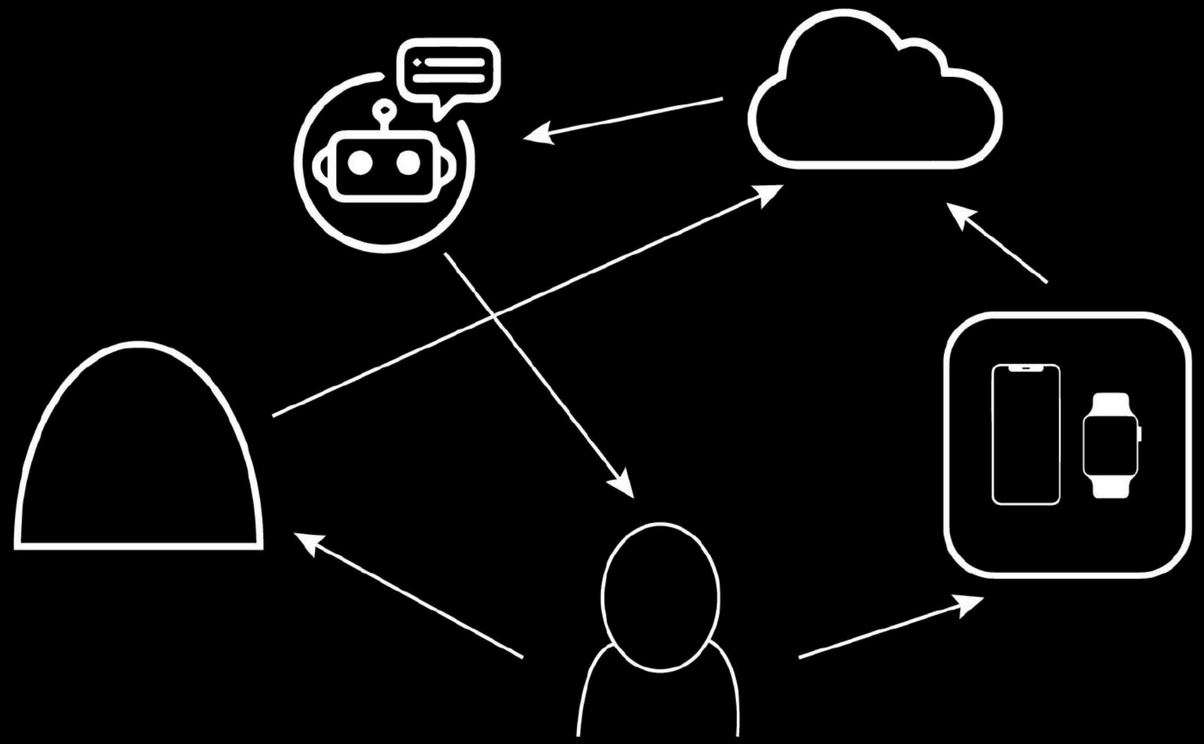
2

You entering the box by the face recognition and the box will show personalised data of the user, knowing your health history

3

The box will do the full body scan and send all data to your doctor

Integrated Information System



Where it is located ?

The MediBoxes will of course be deployed in major cities around the world but the aim is also to deploy them in remote locations (in the mountains, near forests etc...) to avoid medical deserts.
